Building on the huge popularity of the ECLIPSE the SUPERIOR adds even more to that original break through design. It offers even more leg room, it has even more storage, it's designed with the much talked of 'centre of needle' sewing position, it has even more large castors, not just for easy mobility but for stability to, even with its large size they will enable you to move it easily into position. It has the huge work area at the back of your machine which is supported with a sturdy gate leg, this will allow you when needed the beauty of extra support with larger projects it will offer you comfort and consistency of stitch, something that you may never have experienced before. Due to it's individual design and size it allows the user to carry out several different projects at once, the user can stand to the right of their machine and piece together for instance whilst on the far left can sit at another piece of equipment, their overlocker perhaps or maybe pressing items with an iron and pressing mat - it allows you the room to decide. It's for those of you who want that bit more, who need that extra space, who have that bit more room to fill. **It's the ECLIPSE but on a grand scale.**
