

GEMINI

The small cabinet
with big ideas.

Surprisingly compact, this cabinet measures only 2.5ft x 1.5ft when closed, yet still accommodates many of the domestic sewing machines in today's market.

Only slightly larger than the Cub Plus, it offers a more central sewing position, providing users with increased support on all sides and behind the machine.

This unit may not take some the larger domestic sewing machines. If your machine is one of these, you may need to look from the Gemini XL up. Give us a call to check for sure if your machine fits this model.

- 1 Fitted with our long lifter opening (type 1992) which is capable of taking many of the newer (and older) machines on the market.
- 2 Integrated shelves and removable storage bins give generous storage space for your crafting essentials.
- 3 One of our flush mounted sewing machine insets (1992) is included, giving the user an overall more comfortable sewing experience.
- 4 Removable transparent door storage bins positioned beneath the expansion leaves.
- 5 Central sitting position allows you to have your head in line with the needle.

“Really impressed with the table itself, it really is just a lovely piece of furniture that does the job so well”
