Sandstone

Adriatic Blue

Charcoal

## HOBBY CHAIR

The Horn Hobby Chairs offer a sculpted, deeply padded seat and back with a contoured lumbar support that will allow you to achieve your perfect sitting position. Easily adjust its height using the air-assisted elevator and its compact castor base allows for easy access into your sewing cabinet.

## TALL HOBBY CHAIR

Recommended for taller pieces such as the Sewer's Vision, Maxi Hobby Table, Cut Easy Mk-2 and the Compact Hi-Lo.

All the features of the Hobby Chair, but taller! This chair is not exclusively designed for tall individuals; it is crafted to accommodate sitting at either a sewing cabinet height (approximately 29-30 inches) or a standing height surface (approximately 35-36 inches). However, we do understand that everyone is unique and these heights may not be suitable for all. If the ability to sit at both heights is crucial for your purchase, we recommend trying out the chair beforehand to ensure it meets your needs.
